Professional Summary

Experienced GenAI Engineer with a strong focus on Natural Language Processing (NLP) and a proven track record in deploying innovative generative AI applications. Skilled in working with Large Language Models (LLMs) such as OpenAI GPT, LLAMA, and leveraging frameworks like Langchain, LangGraph, Pinecone, and Qdrant for efficient data retrieval and task automation. Expertise includes developing intelligent systems such as FAQ chatbots, document analyzers, and automated content generation tools, utilizing NLP techniques for context-aware querying and data extraction. Adept at optimizing and integrating AI models to solve complex business challenges, enhance user interaction, and streamline workflows. Passionate about continuous learning and collaborating with cross-functional teams to drive impactful AI-driven solutions.

Education

LAKSHMI NARAIN COLLEGE OF TECHNOLOGY, Btech in Computer Science

Jun, 2018 – Jun, 2022

Technologies

Technologies: . Generative AI , Python , Knowledge Graph , RAG , AWS , Langchain , Large Language Models(LLMs) , Prompt Engineering , Lang graph , Vector Stores , OCR , Llama - Index , Lang serve , LangFuse

LLMs: Google Gemini 1.5 pro , Google Palm, Openai GPT-4, Openai GPT-3.5 , Openai GPT-4o , Pixtral 12b , Amazon Titan , Falcon 7b

Experience

AI Engineer, Launch Ventures– Hyderabad

FEB 2025 – Present

- Developed an automated newsletter creation tool leveraging LangGraph state management and GPT-4, integrating real-time web research (Tavily API) and image curation (Google CSE).
- Developed an FAQ chatbot integration for websites, leveraging Pinecone, Langchain, OpenAI LLM, and Crawl4AI. The solution automatically crawls and scrapes website data to generate an intelligent, context-aware FAQ chatbot, enhancing user interaction and providing automated responses based on the website's content
- Developed a Document Analyzer that allows users to upload large files (e.g., PDF, CSV, DOC) and interact with the content by asking context-specific questions, enabling efficient extraction and analysis of data from diverse document formats.

Jun, 2022 – May 2024

Software Engineer, Persistent Systems LTD. – Indore

- Engineered a RAG++ pipeline for Business and Litigation data, utilizing Vector and Knowledge Graph indexes to optimize information retrieval and enhance entity and relation extraction with LLMs.
- Developed the Agentic Copilot, an intelligent agent system using RAG techniques, Langchain, Qdrant, and Langfuse to streamline task assistance, optimize information retrieval, and provide comprehensive logging for improved user interaction.

Dec, 2021 – Jun, 2022

Software Engineer Intern, Persistent Systems LTD. – Indore

- Gained foundational skills in Python programming and built a strong understanding of Machine Learning, NLP, and Deep Learning, setting the stage for advanced AI applications.
